

Risk Warning

The brief statement (even though OTC transactions do not require this statement) does not disclose all the risks of investment leverage and other important aspects. In view of the risks, you begin such a transaction before the transaction should understand the nature and extent of the risks you face, all foreign exchange transactions are not suitable for the general public. You must be based on your experience, objectives, financial and other relevant circumstances, to consider carefully whether such trading is suitable for themselves.

- Leveraged investment. over-the-counter foreign exchange trading with a very high risk. Compared to the value of foreign currency, the initial deposit amount may be small, so that the transaction was of a lever. Even if the market appears relatively small changes you would have been, or will have to deposit the funds have relatively large effects; it may be beneficial to your disadvantage may be. You may be in order to maintain your position in your company. I deposited the initial margin and any additional funds to bear the loss. If your adverse changes in the market or the margins, you might call a short period of time you have to pay a considerable number of additional funds in order to maintain your position. If you can not be provided for additional time to comply with the requirements of the funds, your position may be loss of a winding-up, and you will have caused the amount of the shortfall in charge.
- Directive to reduce risk or strategy. Handed down some of the losses will be designed to limit the amount of specific directives (such as local laws permit "stop loss" orders, or "stop limit" orders may not be effective because market conditions may be A result of these commands is difficult to enforce.) Use a number of positions with the combined strategy may simply be "long" or "short" the same risk.
- Contract terms with the conditions. You have to trade your company asked you a specific foreign currency transactions, options and the corresponding obligations and the terms of the conditions, as well as options, the due date and time to exercise.
- And the suspension of trading and pricing relationships. Market conditions (such as non-mobility), and, in some markets or the operation of the regulations (for example, due to price limit or circuit breakers caused by the suspension of any foreign currency transactions) may increase the risk of loss Because the completion of the transaction or the Qing Ping / hedge position has become very difficult or impossible.
- Cash and property. You must be familiar with you for a variety of local and foreign transactions of money deposited with the property protection measures, especially in the company insolvent or bankrupt. Specific legislation or local regulations may provide for recovery of your property and cash. In some areas, when the outstanding deficit, specially marked for all of your property and cash along with the pro-rata allocation.
- Commissions and other charges. Before you start trading, it should be a clear understanding of your payment will be all the commissions, fees and other charges. These charges will affect some of you may increase your profit or loss.

- In other trading area. In other market areas (including an official connected to the internal market, the market) transactions so that you may face other risks, those markets may be subject to the provisions of the provision of different or reduce the protection of investors. Your local authorities will not force you to implement the other exchanges in the area of management or the market. At the beginning of the transaction you should ask before you with any specific transaction.
- Currency risk. In the foreign currency transaction (if the transaction is in your local area or other), if there is a need for money, your profit loss will be the impact of exchange rate changes.
- Electronic transactions. In a transaction electronic trading system may not only different from open-outcry trading, but also different from other electronic trading systems. If you engage in an electronic trading market, you will face the risks associated with the system, including hardware and software failures. System failure may result in your order is difficult to implement in accordance with your instructions or unenforceable.
